RE: Declaration of Similarity

To the Notified Body,

This letter serves to declare the Johnson Outdoors Solix Series of products contain the following model variants:

Solix 12 -	12" display no SI capability (SW)
Solix 12 SI	12" display
Solix 15	15" display no SI capability (SW)
Solix 15 SI	15" display

All Solix products contain the exact same PCB and electronics with only slight SW differences to designate unit name and some features. The Solix 12s and Solix 15s have a different size LCD (12" vs. 15"). In our judgement, the Solix 15 SI series is the worst case for EMC. The Solix 15 SI having the most functionality, has been submitted for testing to represent all of the Solix 15 SI model variants. The marketing/labeling and DoC will be identical to the previously certified main model apart from the model/brand/ and part number. The technical compliance information and justification for compliance with the essential requirements is contained in the original Technical Construction File which was submitted to TUV SUD BABT in Certificate number: BABT-RED000337 i01.

Sincerely,

A handwritten signature in blue ink, appearing to read "G. Massey", is written over the printed name "Greg Massey".
